New Features

Increased performance with 64-bit architecture

The migration of 2020 Design to 64-bit architecture allows users to effortlessly generate high-quality renderings and 360° panoramas.

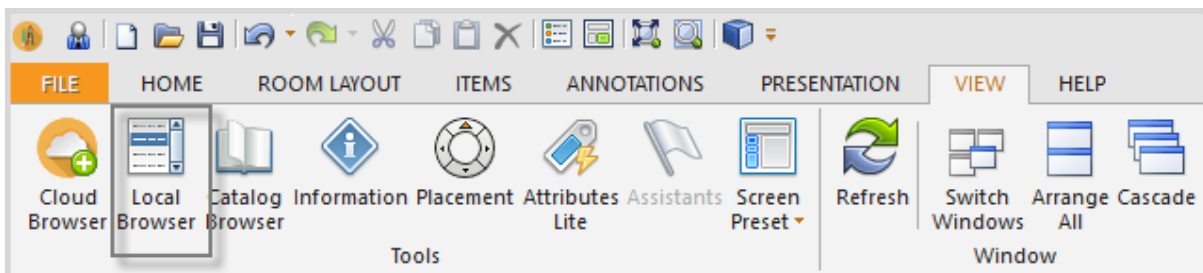

Configurable dockable panes

Click the new « Screen Preset » button to display which dockable pane view is best for you.

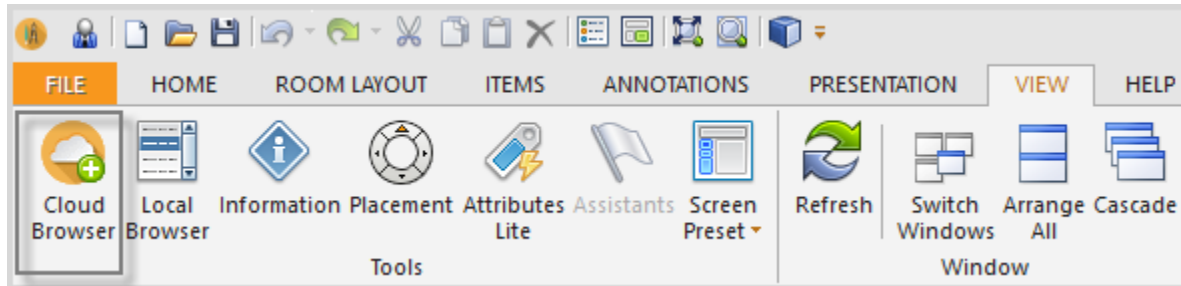

Local Browser for your local catalogs

Your local catalogs are now available from the «Local Browser» option, which was previously called *Drag and Drop*.

Cloud Browser for your catalogs

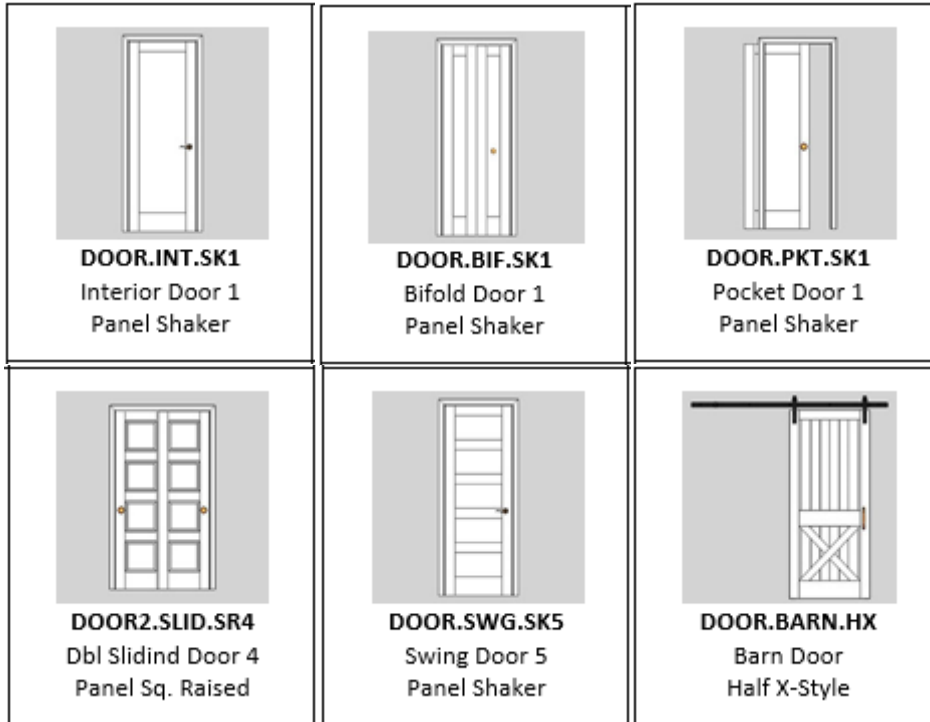

Your cloud catalogs are now available from the «Cloud Browser» option, which was previously called *2020 Cloud*.

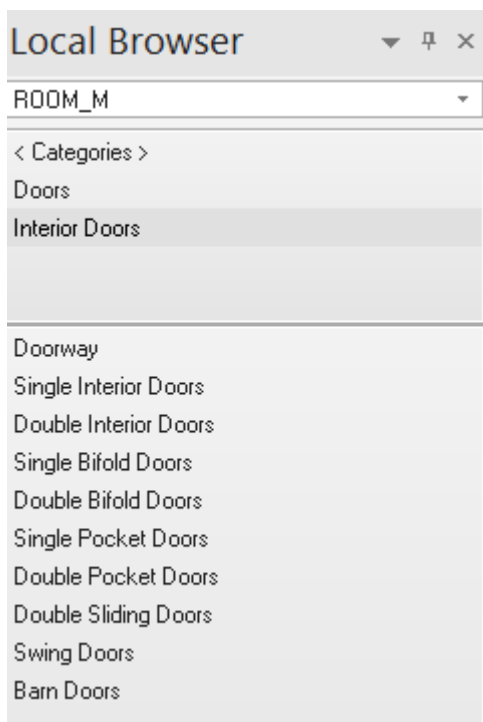

Enhance your designs with the latest interior doors

The ROOM catalogs now include a new collection of exciting door styles to finish your designs with (over 100 interior doors).

The following are a few examples of our amazing new interior doors.

To access these Interior Doors, click Local Browser -> select one of the ROOM catalogs -> click **Doors** -> **Interior Doors**

Add Shaker cabinet door to your designs

The ever popular, simple and beautifully crafted Shaker cabinet door style has been incorporated in the latest version of 2020 Design. There are two variations to pick from with a variety of colors and finishes to design with.

Here are the 2 cabinet door styles we have added to the Sample Catalogs:

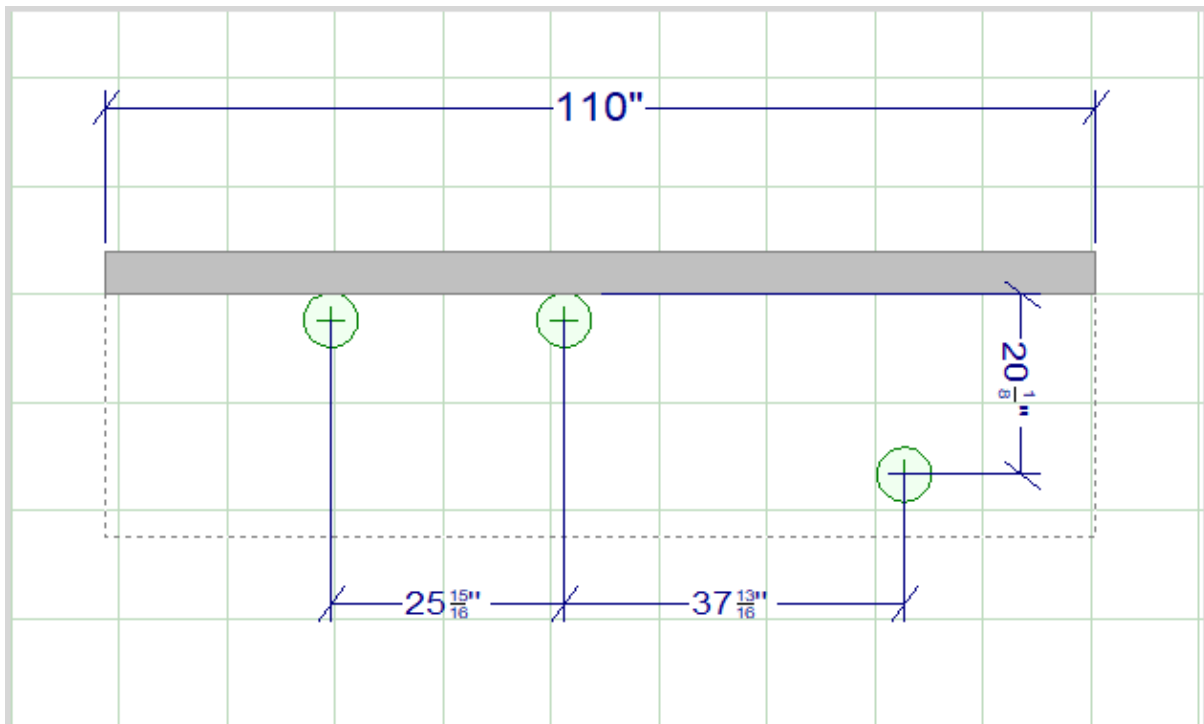

Florence

Shaker

Measure the distance of lighting fixtures more accurately

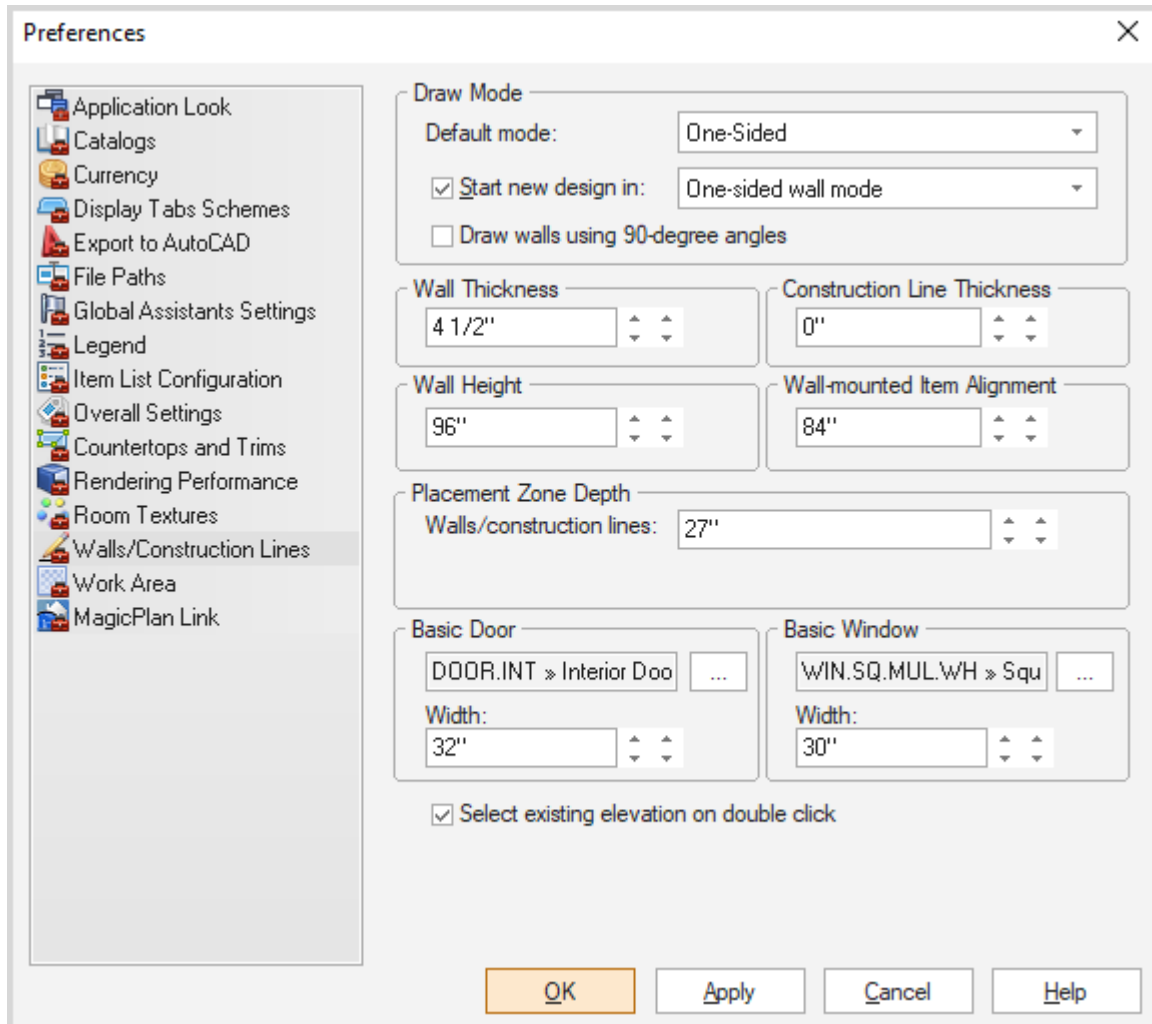

Use the new crosshair embedded in the center of 2020 Design lights to accurately and precisely position lighting within your floor plan. Designers can also annotate the designs accordingly to help the installation and electrical teams they are working with. The design in the following figure was created using recessed lights.

Enable or Disable the duplication of Elevations

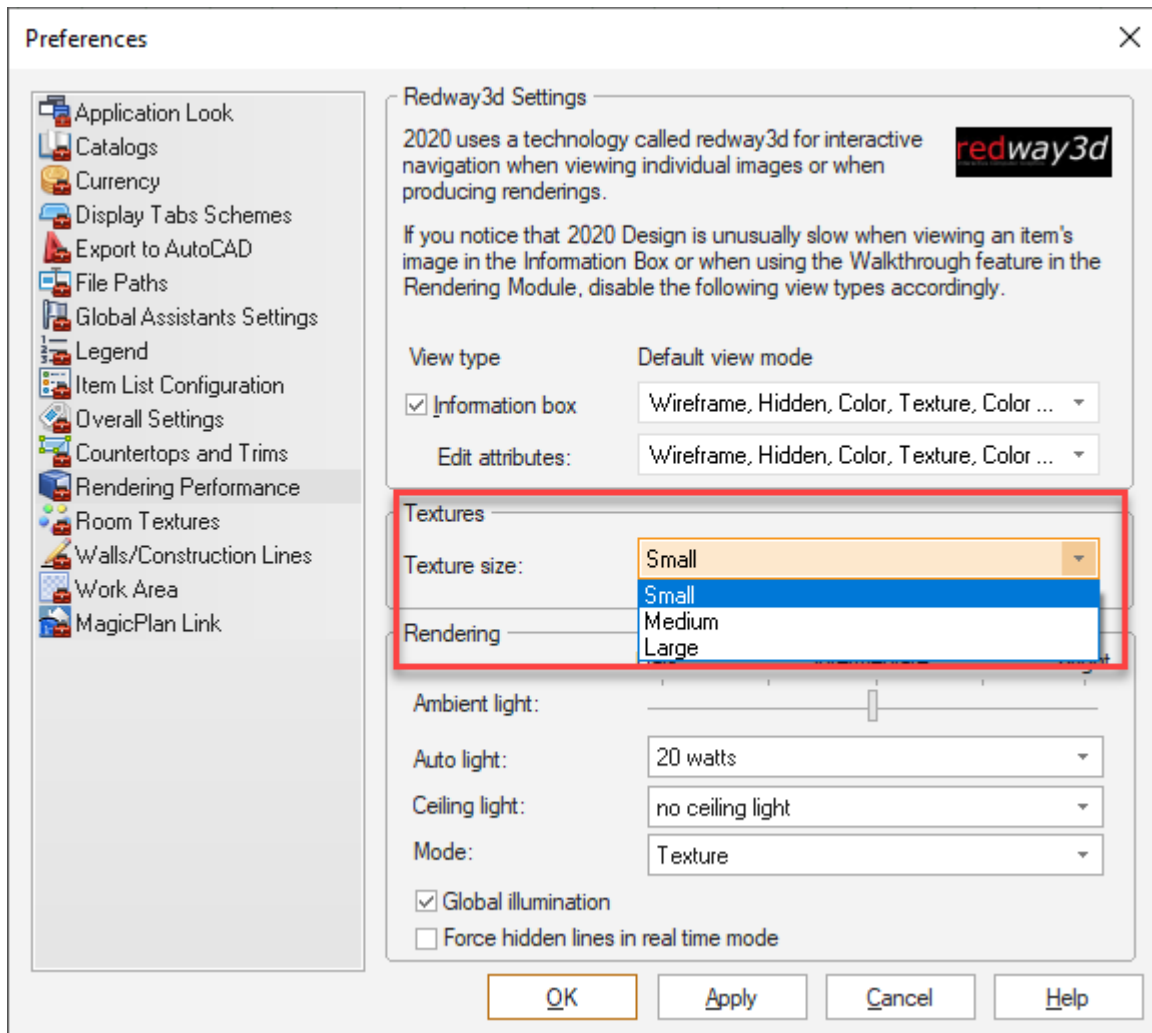

A new check box was added to preferences: **Select existing elevation on double-click.**

By default, 2020 Design does not create a new Elevation when you double-click on the same placement zone more than once.

Change the texture size in your renderings

The Textures section (previously called 'Shapes') has been updated. This allows users to select the texture size to be used for high-quality renderings.

Incorporate the latest SketchUp Models

2020 Design now includes support for the latest SketchUp models, including 2019 models.

Error reporting mechanism

With the error reporting mechanism, 2020 Design can now capture user error logs. With all this user data at our fingertips, we can better analyze any user issue to provide the best possible experience with 2020 Design.

What happened to Room Viewer and QuickBooks?

The « Send to Room Viewer » button was removed from 2020 Design. This functionality is no longer supported.

The « QuickBooks » button was removed from 2020 Design. This functionality is no longer supported.

About NKBA, Auto-Deco, and AutoCAD

The following options were temporarily removed from 2020 Design:

- ▶ NKBA assistant
- ▶ Auto-Deco kitchen assistant
- ▶ AutoCAD Export. NOTE: the import with AutoCAD still works.
